

## LENGTH SENSOR CABLE REEL:

### Over view

Length sensor is used to measure the boom length the wire rope is fixed at the boom tip for accurate boom length measurement

### Features

- The cable reel has spring loaded wire rope
- Housing protection of IP67
- Measurements is optimized for crane movements
- Housing protects inside components from water and humidity

### Operating time

100% (continuous duty)

### Types

- Current type: mV/V 4-20mA
- Voltage type: 0-5V

### Mounting

The wire rope ships with anchor and cable guides
